

PRODUCT SPECIFICATIONS & INSTALLATION INFORMATION

- 01-380-630 **Mounting Plate – Single (19" x 10")**
01-380-640 **Mounting Plate – Double (19" x 10")**
01-380-650 **Mounting Plate – Single (22" x 10")**
01-380-660 **Mounting Plate – Double (22" x 10")**

Specifications:

- Assembly: Plates assemble to fans with hardware pieces included with ATMOX Multi-Mount Fans.
Use: Designed for mounting ATMOX Multi-Mount Fans
Mounting: Mount from inside crawlspace or attic

Tools needed for Installation:

- Drill(s) (Note: Two drills will avoid the need to switch drill bits while in the crawlspace or attic).
- Masonry screw kit (i.e. masonry screws and drill bit for concrete/masonry)
- Drill bit for screws selected

Installation Steps:

1. Follow instructions on the Spec Sheet for Multi-Mount fan to attach fan to the mounting plate.
2. Plate will be mounted to wall from inside the crawlspace or attic. Align the plate to cover the opening.
3. Permanently secure to the wall with 2 to 4 screws. Drill into the top corner of the plate through plastic and into wall using masonry drill bit. (Note: If mounting to brick, it is best to drill into mortar between the brick. If mounting to cinder block, you can drill into mortar or directly into cinder block.)
4. Hold the plate in place and then insert masonry screw and tighten the screw with drill.
5. Repeat steps for drilling, inserting screws and tightening.
6. Fan is ready for power connection, either with AC adapter into standard outlet or via low voltage cable with the wire connector and snap splices.
