

PRODUCT SPECIFICATIONS & INSTALLATION INFORMATION

- 01-380-680 Ridge Vent Plate – 4/12 Pitch
01-380-690 Ridge Vent Plate – 8/12 Pitch

Specifications:

- Assembly: Plates assemble to fans with hardware pieces included with ATMOX Multi-Mount Fans.
Use: Designed for mounting ATMOX Multi-Mount Fans.
Mounting: Mount from inside attic under ridge vent.
Four mounting holes for screws. Screws not included.

Tools needed for Installation:

- Drill/screwdriver
- Screws selected for mounting. (*Note: Check screw depth carefully to avoid roof penetration.*)

Installation Steps:

1. Follow instructions on the Spec Sheet for Multi-Mount fan to attach fan to the mounting plate.
2. Plate will be mounted to ceiling from inside the attic. Align the plate to fit under the ridge vent.
3. Secure to the ceiling with screw through the mounting hole. Repeat for all four screws.
4. To get a better seal for airflow, caulk or seal around the perimeter of the plate. Additionally, seal any gaps to the left or right of fan plate in the ridge vent.
5. Fan is ready for power connection, either with AC adapter into standard outlet or via low voltage cable with the wire connector and snap splices.
