ATMOX ADAPTER INSTALL GUIDE FOR APRILAIRE DEHUMIDIFIERS

ATMOX Dehumidifier Adapter Kit

Item: 02-175-225

Expressly designed for **ATMOX Controllers** to control **Aprilaire Dehumidifiers**.

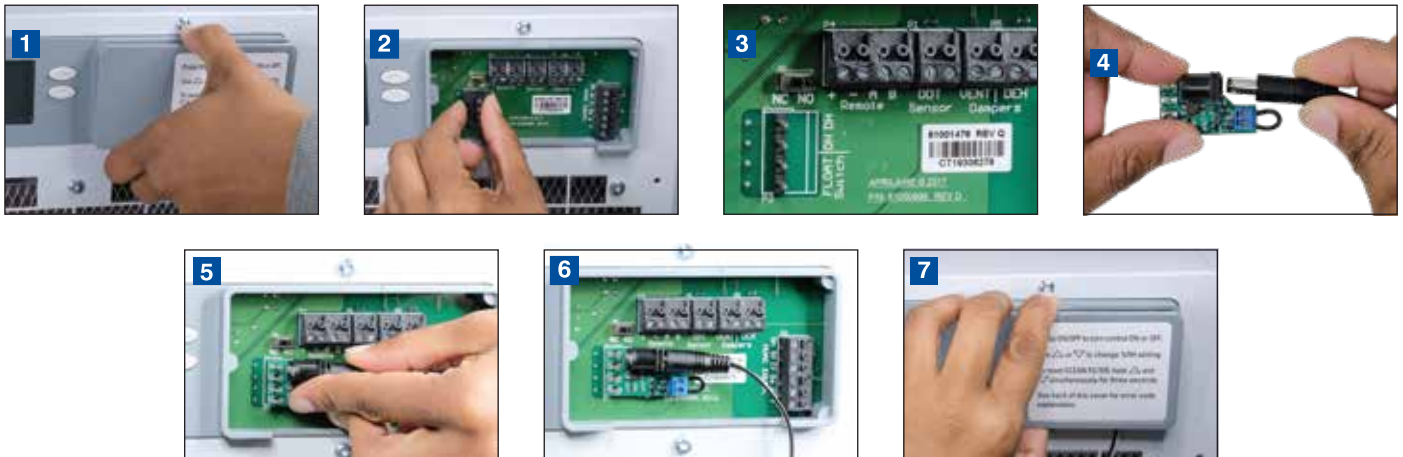

DEHUMIDIFIER PLACEMENT AND STARTUP

Follow instructions supplied by Aprilaire for placement and startup.

ATTACHING ADAPTER KIT

- 1 Remove control panel cover.
- 2 Remove terminal block from lower left side.
- 3 Make sure the switch is set to **NO**.
- 4 Plug the connector wire into the right side of the adapter.
- 5 Attach the adapter by aligning the four pins and push on to secure.
- 6 Wire will hang below in opening.
- 7 Put cover of dehumidifier control panel back in place.

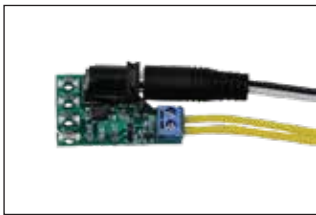

Follow ATMOX low voltage wiring instructions to attach the connector wire to low voltage wire and to plug yellow and black banana plugs into controller.

DEHUMIDIFIER SETTINGS

- 1 Plug in power cord of dehumidifier and turn switch on back of unit to **ON**.
- 2 On display panel, press **MODE** button one time to illuminate screen. **OFF** should be displayed.
Note: Screen must remain illuminated to change settings.
- 3 Press and hold **MODE** button for 3-5 seconds until display reads **REMOTE/DISABLED**.
- 4 Press **MODE** button several times until display reads **EXTERNAL**.
- 5 Press up arrow button to change display to **ENABLED**.
- 6 Press **MODE** button several times until display reads **DONE**.
- 7 Wait until display reads **OFF**.
- 8 Press **ON/OFF** button to enable ATMOX adapter kit to control dehumidifier. Display will read **EXTERNAL**.

CONDENSATE PUMP INSTALLATION

- 1 Follow manufacturer's instructions for condensate pump installation.
- 2 If connecting Float Switch Wiring, connect wire to terminal block on ATMOX adapter in lieu of terminal block on dehumidifier.

TESTING

- 1 Follow instructions for dehumidifier testing based on ATMOX controller installed.
