

PRODUCT SPECIFICATIONS, WARRANTY, INSTALLATION INFORMATION

ATMOX DEHUMIDIFIER PLUG-IN RELAY KIT 2.0

Item: 02-175-120

Specifications:

Power: This is a 15 amp relay. Power needs of selected dehumidifier should be reviewed prior to installation.

Use: Allows for a dehumidifier to be controlled by ATMOX controller.

INSTALLATION INFORMATION

The use of a dehumidifier will require an electrical outlet for power usage of dehumidifier. Determine where dehumidifier will be located.

- 1 Attach the relay kit to a joist.
- 2 Plug the relay kit into electrical outlet.
- 3 Plug the pre-wired connector wire into the relay kit.
- 4 Plug the electrical cord from dehumidifier into the relay kit.
- 5 Set the dehumidifier to run continuously or use the maximum run setting available on selected dehumidifier.

- 6 Follow low voltage wiring instructions in Installation Guide to connect the connector wire to controller.
- 7 Test dehumidifier based on instructions in Installation Guide.

Products manufactured by ATMOX come with a Limited Three-Year Warranty.
