ICE DAMS ✓

Identify your attic moisture concerns

- Do you see condensation or frost on your roof decking or attic surfaces?
- Is mold or wood rot visible in your attic?
- Is high humidity in your attic leading to unhealthy air quality?
- Is your home having issues with ice dams?

Identify your attic heat concerns

- Is your air conditioning struggling to keep your home comfortable?
- Are you seeing damage to items stored in your attic?
- Do you have breakdowns of mechanical equipment in your attic?
- Are your roof shingles deteriorating from extreme heat?

Your attic solution starts with an ATMOX Controller

Bring the **ATMOX Advantage** to your home with fully-automated technology designed specifically for your attic. Let the controller work its magic using sensors and sophisticated software programmed to operate components. Your installer will assist you in determining your solution.

Pair the following choices with an ATMOX controller to maximize your attic solution.

INFORMATION

View your conditions and current operation

The ATMOX display provides information directly to you. You will have constant real-time information from highly accurate sensors on the conditions of your attic such as temperature, humidity and dew point. Responsive alerts provide notifications for any potential issues.

- Provide information on conditions of structure with real-time wood moisture sensor ★
- Alert for potential moisture issues through high wood moisture or elevated relative humidity
- Alert for water detection in an air conditioning condensate line

ILLUMINATION

Inspect your attic easily

LED Lights are a terrific addition to provide easy visual inspections for you and your home service providers.

- Turn lights on and off directly from display
- Have automatic timed shutoff

VENTILATION

Improve your attic with effective moisture control and heat reduction

Attic fans that are properly controlled allow for targeted air exchanges to improve the conditions within the attic.

- MOISTURE CONTROL**
 - Improve conditions through ventilation only when beneficial
 - Compare moisture levels through a dew point comparison to dry effectively when outside air is drier ★
 - Exchange air to expel moisture buildup
- DISTRIBUTED AIR FLOW**
 - Move air evenly across all areas of the attic to avoid temperature differentials that lead to moisture problems
 - Target air circulation in separate sections and corners of the attic
- HEAT REDUCTION**
 - Use temperature data to reduce heat with outside air
 - Ventilate beyond a simple heat trigger to reduce temperature further by running at night or when cooler

★ Unique to ATMOX®

DIVERSIFICATION

Add features or solve unique challenges within any attic design

- ICE DAM MITIGATION**
 - Assist with ice dam mitigation using Snow Mode functionality ★
 - Reduce ice melt with intentional ventilation in freezing environments

- ENERGY EFFICIENCY**
 - Lessen use of air conditioning with reduced attic temperatures
 - Use energy efficient fans to decrease energy consumption
- AIR QUALITY**
 - Exchange air when beneficial to reduce moisture and heat and improve air quality
 - Dispel odors, toxins and material off-gasses to the outdoors with fresh air exchange

About ATMOX®

ATMOX is the creator, developer and manufacturer of controls, monitoring and complementary products for a building's unconditioned spaces with a focus on moisture control and heat reduction. Energy efficiency and air quality are at the forefront of all product development.

ATMOX sells solutions that are wrapped up in boxes and shipped as products. Every ATMOX product is designed to solve a problem and improve the home.

For over 25 years, the company has been strategically focused on the improvement of crawl space and attic moisture solutions. Product development and improvements are continuous as technology advances.

About Our Products

The ATMOX name originates from a derivation of the word atmosphere. The ATMOX products are always designed to create the best atmospheric or should we say ATMOXspheric conditions.

The ATMOXsphere is about bringing the best environment to your unfinished space and ultimately your home. There are many different ATMOX products to incorporate depending on your needs and issues - every home will benefit from an ATMOXsphere. You may need it to remedy moisture issues or to prevent them from occurring at all.

All ATMOX products are backed by a limited three-year product warranty. For more information on ATMOX products, please visit www.atmox.com.
